SUMMARY

A graduate in Primary Education with over 9 years of teaching experience, specializing in math didactics and learning difficulties. My background is complemented by a degree as a Higher Technician in Multiplatform Application Development (DAM), allowing me to merge my passion for education with software development.

I am a proactive, communicative, organized, and detail-oriented problem-solver who enjoys working in a team, facing new challenges, and achieving professional results.

LANGUAGES

- **English: Advanced**
Aptis General C
- **Spanish: native**

SOFT SKILLS

- Communication
- Teamwork
- Critical thinking
- Continuous learning
- Adaptability
- Creativity
- Detail-oriented

EXPERIENCE

Programming Instructor

Logiscool 07/2025 – Present Marbella and San Pedro de Alcántara

- Delivered programming training to over 100 students in English and Spanish, using visual block-based programming (Scratch-like), Python programming, and game development with Godot and Unity.
- Collaborate weekly with international educational institutions, including English International College (EIC) and British International School (BISM).
- Manage the academy's administration: CRM management, automated workflow creation, payment management, accounting record-keeping, and client communication, optimizing administrative processes and contributing to customer retention.

CODI Program Teacher

Mainjobs 08/2025 – 09/2025 San Pedro de Alcántara

- Taught digital skills to children and teenagers through a free government-funded programme and gamified projects, helping improve the digital literacy of families with limited resources.

Video game developer

Bimfloat (DAM Internship) 03/2025 – 06/2025 Malaga

- Contributed to the development and publication of three children's visual novels on Nintendo Switch using Unity.
- Configured prefabs, scenes, and scripts in C#, and researched Generative AI tools for the creation and editing of stories and images, including ChatGPT, Gemini, and Krita AI Diffusion.

Private Tutor

Freelance 09/2015 – 06/2025 Marbella and Malaga

- Provided private tutoring to Primary and Secondary Education students in Mathematics, Spanish Language, English, and Spanish for international students, adapting active learning methodologies and contributing to improved academic performance.
- Promoted the inclusion and independence of students with special educational needs, including visual impairment, dyslexia, dyscalculia, and ADHD.

EDUCATION

Higher Level Vocational Training in Multiplatform Application Development (DAM)

DigitechFP  09/2023 – 06/2025  Malaga

Master's Degree in Advanced Teaching Competencies

Camilo José Cela University  09/2020 – 06/2021  Madrid

Bachelor's Degree in Primary Education, Specialization in Physical Education

University of Malaga (UMA)  09/2015 – 06/2019  Malaga

TECHNICAL DIGITAL SKILLS

Programming languages:

- **Java:** OOP, exception handling, MVC, database access (JPA, Hibernate), **Maven**, **Spring Boot**, **API RESTful**, Android development...
- Web: **HTML**, **CSS**, **JavaScript**, **TypeScript** and **PHP**: DOM access and manipulation, AJAX Requests, JSON and XML data handling, database access...

Technologies and Tools:

- Databases: **MySQL**, **phpMyAdmin**, **MongoDB**.
- Version control: **Git** y **GitHub**.
- Frontend & Frameworks: **React**, **Tailwind CSS**, **NextJS**, **Vite**.
- Methodologies: **Agile/Scrum**, **SOLID** principles, **Clean Code**.
- **AI-Assisted Development – Agent-Based Programming (Big School)**: AI agents, skills, MCP, and Spec-Driven Development (SDD). **GitHub Copilot**, **Codex**, **Cursor**, **OpenCode**, **Claude Code**.

PROJECTS

Further details in my portfolio: <https://manu-reco.github.io/my-dev-portfolio>

MathEdu

<https://manu-reco.github.io/my-dev-portfolio/>

- Educational web platform for Early Childhood and Primary Education teachers focused on mathematics education. It provides free educational articles, course information, and interactive digital activities.
- Designed to make it easy to create articles using custom, engaging components, as well as add new activity levels and interactive stories through JSON files.
- **React**, **Typescript**, **Tailwind CSS**, **NextJS**, **Motion**, **Shadcn UI**.

AYServ Freelancers

<https://github.com/manu-reco/ayserv-autonomos>

- A web system that allows freelancers to manage their business, including registering clients, services with different rates, and sessions on a visual calendar.
- My final project for the DAM degree.
- **HTML**, **CSS**, **JavaScript**, **PHP**, **MySQL**, **MVC**, **Bootstrap**.

Telecom ERP

<https://github.com/manu-reco/telecom-ERP>

- An Enterprise Resource Planning (ERP) system for a telecommunications company. It allows users to manage clients, employees, warehouses, and products, with a focus on usability and data loss prevention.
- Includes features such as dynamic CRUD and PDF invoice generation.
- **HTML**, **CSS**, **JavaScript**, **PHP**, **MySQL**, **MVC**, **Bootstrap**.

Visual Novels for Nintendo Switch

<https://www.nintendo.com/es-cl/store/products/the-guardians-of-the-secret-garden-switch/>

- Children's visual novels developed with Unity and the Naninovel plugin.
- Used Generative AI (ChatGPT, Gemini, and AI integrated into Krita) to create and improve images and stories.
- A group project completed during my DAM internship at Bimfloat.
- **Unity**, **C#**, **ChatGPT**, **Gemini**.
